

Inside Reporting 3rd Edition By Tim Harrower

Includes section "Book reviews" and other bibliographical material.

The third edition of Legal Considerations for Fire & Emergency Services is a reader-friendly guide to the challenging legal issues that firefighters and emergency service personnel encounter. Written by J. Curtis Varone, a practicing attorney as well as an experienced firefighter, this book explores such key topics as fire department liability, search and seizure, sovereign immunity, overtime laws, cost compliance, workers' compensation, physical abilities testing, medical examinations, drug testing, discrimination, and sexual harassment. It is a perfect textbook for any course on fire service law as well as an indispensable desk reference for day-to-day fire department administration. Features of the new 3rd Edition: • Updated cases on several topics including residency requirements, employment, and expanded treatment of hot topics such as digital imaging, social media, and electronic surveillance • Meets the latest requirements for FESHE's Legal Aspects of the Fire Service curriculum • Many new photos and graphics to help connect cases to day-to-day issues in the fire service • Coverage of recent changes to search and seizure law, use of digital photos and social media by emergency personnel

Holly Sklar presents a disturbing vision of the modern, corporation-dominated America, where the rich get richer, the poor are mired in poverty, and the society no longer cares for its children. Skillfully woven together with empathic insight into the lives and minds of those who self-injure, "Healing the Hurt Within" is replete with the latest developments in the field. Informative statistical data, instructive diagrams, carefully selected resources, case studies, expert testimonies, and practical self-help activities. The author's warmth, compassion, and regard for those caught in the cycle of self-injury is profoundly enlightening and extensively updated 3rd edition. "Healing the Hurt Within" offers: solace, hope, and direction to those who self-injure; guidance to family and friends supporting a loved one who self-injures; and, guidelines to professionals and voluntary caregivers on how to respond to clients that self-injure.

This is a bestselling, comprehensive, and widely used resource on writing for nurse clinicians, graduate students, researchers, and faculty. It covers all types of writing that beginning and experienced nurse-authors may be required or choose to do: E-B research papers, journal articles, book chapters, clinical project findings and innovations, and preparing manuscripts for courses and all types of publication, including open access journals. Brimming with helpful examples, the book takes the reader step-by-step through the entire process of writing, from the generation of an idea through searching the nursing literature, preparing an outline, writing and revising a draft, and submitting the manuscript for publication. This third edition includes an entirely new chapter on writing articles regarding quality improvement studies, and new information about writing for open access publications. It is also replete with examples of the type of writing required for successful DNP capstone projects. This text does for reporting what Tim Harrower's The Newspaper Designer's Handbook has previously done for design: make it fun and accessible to newcomers. Harrower is an award-winning editor, designer and columnist who has previously taught at Portland State University and currently conducts journalism workshops. Inside Reporting emphasizes the basics but also provides a wealth of information on online reporting and packaging stories in more visual, interactive ways. It also includes more useful information on feature writing—from stories to reviews and column-writing—than any other text in the field.

Introductory Medical Statistics, now in its third edition, is an introductory textbook on basic statistical techniques. It is written for physicians, surgeons, radiation oncologists, medical physicists, radiographers, hospital administrators, medical statisticians in training, bichemists, and other professionals allied to medicine. It is suitable for the third edition of HIT or Miss: Lessons Learned from Health Information Technology Projects presents and dissects a wide variety of HIT failures so that the reader can understand in each case what went wrong and why and how to avoid such problems, without focusing on the involvement of specific people, organizations, or vendors. The lessons may be applied to future and existing projects, or used to understand why a previous project failed. The reader also learns how common causes of failure affect different kinds of HIT projects and with different results. Cases are organized by the type of focus (hospital care, ambulatory care, and community). Each case provides analysis by an author who was involved in the project plus the insight of an HIT expert. This book presents a model to discuss HIT failures in a safe and protected manner, providing an opportunity to focus on the lessons offered by a failed initiative as opposed to worrying about potential retribution for exposing a project as having failed. Access expert insight into key obstacles that must be overcome to leverage IT and transform healthcare. Each identified case study includes an analysis by a group of industry experts along with a counter analysis. Cases include a list of key words and are categorized by project (e.g. CPOE, business intelligence). Each case study concludes with a lesson learned section.

Medical Conditions in the Athlete, Third Edition, equips health care providers with the information they need to develop a framework for decision making when working with injured and recovering athletes and active populations. The Book That Every Citizen and Journalist Should Read "What this book does better than any single book on media history, ethics, or practice is weave . . . The book should become essential reading for journalism professionals and students and for the citizens they aim to serve." —Carl Sessions Stepp, American Journalism Review "If you think journalists have no idea what you want . . . here is a book that agrees with you. Better—it has solutions. The Elements of Journalism is written for journalists, but any citizen who wonders why the news seems trivial or uninspiring should read it." —Marta Salió, Detroit Free Press The elements of journalism are: * Journalism's first obligation is to the truth. * Its first loyalty is to citizens. * Its essence is a discipline of verification. * Its practitioners must maintain an independence from those they cover. * Its practitioners must be allowed to exercise their personal conscience.

Wie dit boek over de raadsels van het alledaagse leven heeft gelezen moet wel concluderen: economie is belangrijk, interessant en erg leuk. de Volkskrant ' Levitt stelt ongewone vragen en geeft provocatieve antwoorden. Slim, precies en net in detail. New York Times The ability to communicate in writing is an essential skill, particularly for nurses at the graduate level. This is a bestselling, comprehensive, and widely used resource on writing for nurse clinicians, graduate students, researchers, and faculty. It covers all types of writing that beginning and experienced nurse-authors may be required or choose to do: E-B research papers, journal articles, book chapters, clinical project findings and innovations, and preparing manuscripts for courses and all types of publication, including open access journals. Brimming with helpful examples, the book takes the reader step-by-step through the entire process of writing, from the generation of an idea through searching the nursing literature, preparing an outline, writing and revising a draft, and submitting the manuscript for publication. This third edition includes an entirely new chapter on writing articles regarding quality improvement studies, and new information about writing for open access publications. It is also replete with examples of the type of writing required for successful DNP capstone projects. This text does for reporting what Tim Harrower's The Newspaper Designer's Handbook has previously done for design: make it fun and accessible to newcomers. Harrower is an award-winning editor, designer and columnist who has previously taught at Portland State University and currently conducts journalism workshops. Inside Reporting emphasizes the basics but also provides a wealth of information on online reporting and packaging stories in more visual, interactive ways. It also includes more useful information on feature writing—from stories to reviews and column-writing—than any other text in the field.*

Introductory Medical Statistics, now in its third edition, is an introductory textbook on basic statistical techniques. It is written for physicians, surgeons, radiation oncologists, medical physicists, radiographers, hospital administrators, medical statisticians in training, bichemists, and other professionals allied to medicine. It is suitable for the third edition of HIT or Miss: Lessons Learned from Health Information Technology Projects presents and dissects a wide variety of HIT failures so that the reader can understand in each case what went wrong and why and how to avoid such problems, without focusing on the involvement of specific people, organizations, or vendors. The lessons may be applied to future and existing projects, or used to understand why a previous project failed. The reader also learns how common causes of failure affect different kinds of HIT projects and with different results. Cases are organized by the type of focus (hospital care, ambulatory care, and community). Each case provides analysis by an author who was involved in the project plus the insight of an HIT expert. This book presents a model to discuss HIT failures in a safe and protected manner, providing an opportunity to focus on the lessons offered by a failed initiative as opposed to worrying about potential retribution for exposing a project as having failed. Access expert insight into key obstacles that must be overcome to leverage IT and transform healthcare. Each identified case study includes an analysis by a group of industry experts along with a counter analysis. Cases include a list of key words and are categorized by project (e.g. CPOE, business intelligence). Each case study concludes with a lesson learned section.
